PROFESSIONAL SUMMARY

Software Engineer with 2 years of professional experience in enterprise banking applications at TCS. Passionate about Python backend development with hands-on experience building projects using Django, Django REST Framework, PostgreSQL, REST APIs, and Docker. Experienced in SQL, production support, debugging, and solving real-world engineering problems.

TECHNICAL SKILLS

Languages: Python, SQL, C, Java (Core), JavaScript

Backend & APIs: Django, Django REST Framework, RESTful API design, microservices concepts

Databases: PostgreSQL, MySQL,

ORM: Django ORM

DevOps & Deployment: Docker, Docker Compose, Gunicorn, CI/CD, GitHub Actions

Security: JWT / token-based authentication, 2FA, audit logging

Testing: API testing (Postman), STLC

Tools: PyCharm, VS Code, Postman, Git

Currently Learning: AWS, DSA (JAVA)

WORK EXPERIENCE

Software Engineer (Backend & Quality Engineering)

Tata Consultancy Services, Bengaluru, Karnataka

Jun 2024 – Present

Client: Nordea Bank

- Engineered backend data-processing workflows integrating **Mainframe** and **Snowflake**, supporting batch pipelines across the banking platform.
- Optimized **SQL** queries to perform data validation and quality checks, ensuring **data integrity** across high-volume datasets.
- Designed test scenarios and test cases for data pipelines and **batch processing systems**, improving defect detection earlier in the cycle.
- Collaborated with cross-functional teams to diagnose and resolve defects, improving overall system reliability.
- Supported **production systems** to ensure **high availability and performance**, debugging issues in a live banking environment.

PROJECTS

Banking Full-Stack Web Application — Django REST Framework, PostgreSQL, Docker

- Built a **production-ready** banking platform with an **API-driven architecture** and a responsive frontend, owning the feature **end-to-end** from design to deployment.
- Designed **RESTful endpoints** using Django REST Framework with reusable serializers for account transactions and secure loan processing.
- Implemented security controls including **token-based authentication / 2FA**, transaction audit logging, and automated PDF receipt generation.
- Containerized** the full stack (Django + PostgreSQL) with **Docker Compose** for consistent, reliable deployments.
- Authored unit & integration test suites and integrated them into a **GitHub Actions CI/CD** pipeline, validating database concurrency stability and API rate limiting for near-zero-defect releases.

TODOIFY — Premium Task Management App — Django, PostgreSQL, Docker, Gunicorn

- Built a full-stack task management application with Django and PostgreSQL, **containerized with Docker** for seamless cross-environment deployment.
- **Orchestrated multi-container services** with Docker Compose, automating database migrations and backend service initialization.
- Implemented production-ready configurations including **Gunicorn** serving and environment-based **security/secret management**.

EDUCATION

BE, Electronics & Communication Engineering

S J C Institute of Technology, VTU | 2019–2023 | CGPA: 8.10

CERTIFICATIONS

- REST API Design — Udemy
- API Technical Writing: JSON and XML for Writers — Udemy
- Python Programming and Python Functions — Udemy
- Python 101: Develop Your First Python Program — Coursera
- Introduction to Programming Using Python – HackerRank
- 500 difficulty rating coding problems - codeChef
- Internship in Embedded & IoT — Pentagon Space Pvt. Ltd.

EXTRACURRICULAR

Video Editing, Photo Editing, Cooking, Coding
