PROFESSIONAL SUMMARY

Software Engineer with with 2 years of professional experience and over 3 years of dedicated experience in Python development. Proven expertise in building end-to-end custom software solutions, backend data systems, and API validation. Adept at using Django for complex application logic and integrating scalable databases. Skilled in SQL, RESTful API design, and automated CI/CD pipelines to deliver high-quality, business-aligned software.

EDUCATION

S J C Institute Of Technology — VTU

BE — Electronics and Communication Engineering — CGPA: 8.10

Chikkaballapur, Karnataka, India

2019 - 2023

BEST PU College

PCMB — Percentage - 73.4

Chikkaballapur, Karnataka, India

2017 - 2019

Prakruthi Vidyanikethan School

Percentage - 80.32

Chikkaballapur, Karnataka, India

2016 - 2017

TECHNICAL SKILLS

Programming Languages: Python, C, JAVA (Core JAVA).

Web Technology - Frontend: HTML, CSS, Java Script

Web-framework, Web-API: Django(Python), RESTful API

Database: MySQL, PostgreSQL

Software Tools: Pycharm, VS code, Postman

Testing: Test Case Design, API Testing (Postman)

Learning: Automation Testing

Concepts: SDLC, STLC, CI/CD

WORK EXPERIENCE

Software Engineer (Backend and Quality Engineering)

Tata Consultancy Services, Bengaluru, Karnataka

JUN 2024 - PRESENT

• Worked on Nordea Bank Project

- Worked on backend data processing workflows involving Mainframe and Snowflake integration.
- Performed data validation and quality checks using SQL queries to ensure data integrity.
- Designed test scenarios and test cases for data pipelines and batch processing systems.
- Collaborated with cross-functional teams to identify defects and improve system reliability.
- Supported production systems ensuring high availability and performance.

PROJECTS

• Bank Full-Stack Web Application - Designed a web application for Bank operations.

Built a production-ready banking web app with Django REST Framework, featuring an API-driven architecture and a modern, responsive frontend. Implemented strict security measures including 2-Factor Authentication (2FA), detailed transaction audit logging, and automated PDF receipt generation. Containerized the entire technology stack (Django, Postgres) using Docker Compose to ensure consistent, reliable deployments. Wrote automated test suites to guarantee database concurrency stability and secure API rate limiting.

Key Features:

1. **Architecture:** Engineered a robust Django solution with a clean separation of concerns (Models → Serializers → Views → Templates).

2. **API Design:** Designed RESTful endpoints using Django REST Framework; implemented reusable serializers for account transactions and secure loan processing.
3. **Automated Verification:** Authored unit and integration tests (test_*.py) and integrated them into a **GitHub Actions** pipeline for zero-defect deployments.

- **TODOIFY - A Premium Task Management App**

1. Built a full-stack task management application using Django and PostgreSQL, containerized with Docker for seamless cross-environment deployment.
2. Orchestrated multi-container services using Docker Compose, automating database migrations and backend service initialization.
3. Implemented production-ready configurations, including Gunicorn serving and environment-based security management.

CERTIFICATIONS

- . API Technical Writing: JSON and XML for writers - Udemy [Link](#)
- . Python 101 - Develop your first python program - Coursera [Link](#)
- . Python Programming and Python functions - Udemy [Link](#)
- . REST API design - Udemy [Link](#)
- . Completed an internship in **Embedded and IOT** conducted by Pentagon Space Pvt limited.

EXTRACURRICULAR ACTIVITIES

- * **Video Editing, Photo Editing, Cooking, Coding**
